### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30 day MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 1-30 are pending in this application.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - a. Group I, claims 1-18, drawn to methods and system used for processing interrupts, specifically interrupt inhibition, classified in class 710, subclass 262.
  - b. Group II, claims 19-23, drawn to methods used for prioritizing incoming messages, classified in class 709, subclass 207.
  - c. Group III, claims 24-30, draw to methods used for task control and resource allocation, classified in class 718, subclass 100.
3. Inventions Group I, and Group II are related as subcombinations disclosed as usable together in a single combination. Group I is drawn to interrupt inhibition. Group II is drawn to prioritizing incoming messages. The combinations are distinct from each other if they are shown to be separate usable. In the instant case, inventions Group I and Group II have separate utility such as search for Group I invention is not required for Group II and vice versa.
4. Inventions Group II, and Group III are related as subcombinations disclosed as usable together in a single combination. Group II is drawn to prioritizing incoming messages. Group III is drawn to resource allocation. The combinations are distinct from each other if they are shown to be separate usable. In the instant case, inventions

Art Unit: 2195

Group II and Group III have separate utility such as search for Group II invention is not required for Group III and vice versa.

5. Inventions Group I, and Group III are related as subcombinations disclosed as usable together in a single combination. Group I is drawn to interrupt inhibition. Group III is drawn to resource allocation. The combinations are distinct from each other if they are shown to be separate usable. In the instant case, inventions Group I and Group III have separate utility such as search for Group I invention is not required for Group III and vice versa. See MPEP §806.05(d).

6. Because these inventions are distinct for the reason given above and have required a separate status in the art shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
